

The Chamber of Commerce of Venice Rovigo is pleased to present Venicexport, the web portal of importers and exporters from the provinces of Venice and Rovigo. The portal is available both in Italian and in English at [www.venicexport.it](http://www.venicexport.it) and [www.venicexport.com](http://www.venicexport.com)

Venicexport - managed and promoted by the Foreign Certification Office of the Chamber of Commerce of Venice Rovigo - is an important showcase for Venice and Rovigo companies operating on the International market, especially for the small and medium enterprises, which are the core of the provincial economy.

The aim is to create new business relationships with foreign partners, also in cooperation with the institutional bodies that create opportunities and promotional events on target markets.

The opportunities offered to companies registered in the portal are:

- Direct contact: foreign operators visiting Venicexport can contact directly the companies by using the links to the websites and the e-mails;
- Creation of lists of companies: it is possible to download lists of companies by searching product sector or other criteria;

In the portal Venicexport you can also find:

- data on the economy, on typical products, on foreign trade and on the infrastructures of Venice and Rovigo Provinces
- contacts of local organizations promoting internationalization.

Furthermore, the promotion of the companies abroad is supported by the Nuovo Centro Estero Veneto (New Veneto Foreign Trade Centre), the operational arm of the Chamber of Commerce of Venice Rovigo and the Chamber of Commerce the Treviso Belluno.

The New Veneto Foreign Trade Centre supports the economic and productive system of the region, providing services for the two Chambers of Commerce and the Veneto Regional Government, which signed a three-year Program Agreement for the economic promotion and internationalization of Veneto companies.

The aim of the New Veneto Foreign Trade Centre, inaugurated on November 6th, 2018, is to become a reference point for the promotion of the Veneto companies in the foreign markets, in particular the most dynamic and strategic, so that the region can continue to be one of the most industrialized regions of Europe. The New Foreign Trade Centre will represent the Veneto region (with specific attention to the provinces represented by the associated Chambers of Commerce) in the main trade

fairs, by organizing business meeting abroad and in Veneto, and by providing export training for the companies.
